**CUTTING WITH DIAMOND DISCS**

Our products can be cut using diamond discs fitted onto the hand-held electrical grinding machine. The speed of Disc rotation must be high (>10000 RPM) and should have a low feed rate (< 1 m/min). It may be required to cool the disc with water. Recommended discs are the thin types generally used for cutting porcelain stoneware. The surface should be kept on a FLAT base while cutting without any gap underneath

**DRILLING**

You can use cutting discs fitted to battery-operated screwdrivers or angle grinders, electrical drills as an alternative.

**INTERNAL CUT / L-SHAPED CUT**

To get internal and L-shaped corners & to reduce the risk of breakage, round o the vertex of the internal corner using bits with a radius of at least 5mm. Then cut with diamond discs, be cautious to stop moving the cutting tool forward. To drill and cut using diamond discs, follow the instructions provided above.

When using these tools:  
-Cool the point being drilled with water  
-Don't put too much pressure and bear in mind the resistance of the type of laminated stoneware you are working on  
-If you are using tungsten bits, start drilling at a low speed  
-If you are using drills or screwdrivers, do not select hammering mode
